Re: Letter of Recommendation

Our property is located off of Prosperity Farms Road on the IntraCoastal Waterway in Palm Beach Gardens and we are less than 2 miles from the ocean at Juno Beach. We have approximately 3 acres of ground which is larger than most residential properties.

We have been clients of Lady Bug Landscape for almost 2 years. They do our lawn maintenance as well as our fertilization. Their crews are extremely professional, listen to our instructions as to how we want hedges and bushes trimmed and maintained, keeping all areas edged and weeded. They use spray for weed control but also pull the weeds as needed or directed.

In addition to the regular lawn and plant fertilization, they have quickly responded when we have notified them of plants or bushes needing extra treatments. They also keep an eye out for problem areas and alert us to any of their concerns. We feel our lawn and garden areas are in the best condition they have been in for several years.

Two years ago we built a home for my mother on our property. Randy Simoes worked with us designing and laying out the yard, trees, flower areas etc. He addressed our planting preferences as well as offering suggestions to compliment color and visual appeal of planting areas. Everything was handled quickly and efficiently from laying the sod, all finish plantings and then the mulching. We regularly have all areas cleaned and weeded prior to mulching. Once our installation date is set the crew moves in, gets the job done and cleans up completely before leaving.

It is without hesitation that Russ and I, as well as my mother Donna Hux, recommend Lady Bug Landscape Services. Randy and Jacky Simoes are honest, hardworking individuals that maintain as well as care for the needs of their staff and crews.

We invite you to come see our beautifully landscaped property for yourselves.
